

April 16, 2020

Dear Counselors, Teachers and Friends,

We hope you are doing well during this trying time. Junior Achievement remains committed to our partnering schools and wants to provide you with resources to share with your students and families.

One of our favorite and most exciting Specialty Programs is the Job Shadow. Typically, during the months of March, April and May we would be as busy as can be imagined scheduling career experiences for your students at a variety of sites around Connecticut. Since that is not possible this spring, due to the COVID-19 virus, we are sending links to some careers your students may want to learn more about. Please feel free to share these links.

Additionally, we have heard from many of our volunteers who miss spending time with JA students. Several have agreed to participate in virtual panels with students and some have offered tutoring in STEM courses. If you are interested in any of these opportunities, please contact me and we will arrange a program just for you.

Thank you for your commitment to the students of Connecticut and their future. We appreciate our partnership and look forward to working together to help prepare tomorrow's future workforce.

Thank you and stay well,

Julie Armstrong
