Today you are the Electrician for JA BizTown. You are responsible completing an Electrical Circuit Project and working on an Electrical Repair Project in the town. Safety must be your Top Priority. Do Not Try any of these project in your own home. Please follow all directions carefully.

1. Remain in your business until after the Pledge of Allegiance to help with business start-up, your business needs everyone’s help before it opens.

2. Attend any meetings called by the CEO to discuss what everyone will be doing and the importance of doing quality, accurate work.

3. After the Pledge of Allegiance, you can begin the Electrical Circuit projects. Follow the directions carefully for this in your green manual.

4. Throughout the morning, look for when the lights above the Construction sign outside of your business go out. This is caused by a blown fuse. You will need to fix this fuse following the directions in your red Electrical Engineer Manual carefully.

5. Follow the steps in the manual to fix the fuse for your business sign. Let a JA Staff person know when the fuse has been fixed.

6. Sometime in the afternoon, the CEO from BizTee may visit you with a T-Shirt sign that does not light up. Open the back battery compartment and test each of the batteries with your battery tester. Make sure to pay attention to which end the + side of the battery should go and which end the – side should go. Hold the battery in place and look at the indictor window to see if the battery is good or not. Place the dead batteries in the “Dead Battery” box and put new batteries in the sign. Make sure it is working properly before you return it to the BizTee CEO.

7. If time permits, you will produce an item that will be stocked in the Distribution & Delivery Center for later use. Follow the instructions provided by the JA BizTown staff person and check with your CEO.

8. Work hard to meet your production goal and make the highest quality products possible.

9. Assist with business clean up at the end of the day.
