

Since 1956 Junior Achievement of Brazoria County, Inc. has been educating, and inspiring youth to value free enterprise, business, financial literacy and economics in order to improve the quality of their lives.

This year in thirty-six schools, 400+ volunteers presented Junior Achievement programs to over 6,500 students in K-12th grade. JA is preparing the workforce of tomorrow by giving them an understanding of how business operates today.

Investments from businesses and individuals help JA change traditional classrooms into learning laboratories of the future. This environment fuels the entrepreneurial spirit and inspires students to excel.

The energy that brings economic and business concepts to life is the volunteer dimension of JA. Its unique delivery system engages executives, owners of small businesses, retirees, parents, and college students in the education of youth. Become a JA volunteer today!

Junior Achievement's purpose is to educate, and inspire young people to value free enterprise, business, money matters and economics to improve the quality of their lives.
