The JA Company Program (JACP)

The JA Company Program provides high school students with the opportunity to explore the world of business and entrepreneurship by creating and managing their own company.

While participating in the JACP, students develop professional skills, such as financial literacy and brand marketing, as well as critical personal skills such as public speaking, collaboration, and leadership development.

Over the course of the 5 month program, students identify a need in their community, develop a business plan, and produce and sell a product, while building relationships with their peers and corporate mentors. The JA Company Program is a transformational experience for both students and mentors alike.

Our Growth: We are currently running...
