

Albert (“Al”) Ruiz

Managing Director Digital Mobility & Internet of Things- Accenture

Mr. Ruiz is tasked with growing market presence in this emerging field and driving innovation and value for Accenture’s largest energy clients. Al is a 17 year veteran of the mobility and technology industry and has deep experience helping client transform the way they do business through mobile technology.

In his current role Al drives and develops IoT solutions across the resources operating group. His team works with industry executives to define, deliver and deploy solutions that help companies mobilize and IoT enable their applications & products to drive operational efficiency as well as create new revenue opportunities. Prior to this role, Al was the North America Sales & Consulting lead for Mobility focused on delivering innovation and technology enabled business transformation to Accenture’s North American Utilities and Energy client portfolio.

Prior to Accenture, Al lead Verizon Wireless’ business strategy for the energy market and also spent 8 years leading mobile network deployments at Lucent Technologies for the largest telecom operators in the world.

Al has Bachelors in Mechanical Engineering from the State University of New York at Buffalo.
