SIGN UP TODAY to volunteer at the JA Business Challenge where you will mentor students throughout the day as they make business decisions and compete for scholarship money. This is a powerful learning experience where high school students experience the real-world application of business concepts as they manipulate an online business to manufacture and market a product. You will be guiding a team of students through a series of online business simulations; provide suggestions for students to outperform their competition in terms of profit, sales and market share; provide ideas for business name and logo; monitor time as each round of competition plays out; ensure team participation, fun and laughter. We need you to inspire these students by providing your experience and insight.

For more event information, please contact Christine Williquette at cwilliquette@jawis.org or 920.336.1444.
